

Our food is prepared fresh to be delicious and resounding with flavor. Follow these easy instructions to enjoy our foods to their fullest.

Since every stove is slightly different, we have given a range of times to reheat our dishes. Try heating the minimum time suggested and then check every few minutes until food has reached desired heat. (165 degrees f)

All items can be removed from the foil pan and placed in a microwave safe container and microwaved until HOT.

**IMPORTANT: All foods should be brought to room temperature before reheating.
If your entrée comes with a plastic lid, be sure to remove it before reheating**
